Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Farmer who provides soil and environmental details and receives the crop recommendation.
Rectangle with numbered header	Process	Validates inputs, predicts the best crop using the machine learning model, and displays the result.
Rectangle (solid fill, no number)	Data Store	Stores the agricultural dataset and trained machine learning model (model.pkl).
Labeled arrow	Data Flow	Represents the flow of data between the farmer, processes, and data stores.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
